### Discover everything about Finding Water

by Jadeilson Rocha

Updated on September/08/2017

#### What is

The Finding Water is a platform that seeks the integration between the user and the diverse information collected in an easy and agile way, here the user finds all the important information for its diverse uses like: correct ways of treatment and reutilization of the water, sources of water in your region, how to proceed if there is a lack of water for several days, etc.

#### Other News

##### Finding Water News

In reports made available by Unesco it is possible to be aware of the problems caused by the lack of availability of water in a global context.
